TECHNICAL SKILLS

Programming Languages: Java, JavaScript/TypeScript, Kotlin, Scala, Python, SQL, C++, C, HTML, CSS
Frameworks and Tools: AWS, Distributed Systems, Dagger2, Google Guice, React, JUnit, Jest, Git, CI/CD, GenAI-assisted development

PROFESSIONAL EXPERIENCE

Software Development Engineer II (SDE2)

Amazon Inc.

April 2024 – Present

Vancouver, BC, Canada

- Led end-to-end architecture, implementation, and production launch of the **OTC Benefits (Directed Spend Benefits Card)** payment method, enabling healthcare benefit card payments across Amazon Retail, Fresh, and FBA; coordinated delivery across **10+ cross-functional teams**.
- Designed backend card registration and payment processing workflows and established a **standardized plugin-based integration framework** adopted across Amazon Payments.
- Delivered full-stack implementation spanning backend services, payment validation, routing logic, customer-facing registration UI, and monitoring infrastructure; maintained **99.9%+ service uptime** with **zero customer-impacting issues** during launch.
- Launched OTC Benefits on **January 1, 2026**, enabling **1K+ benefit card registrations** and **hundreds of successful orders** within the first 48 hours of availability.
- Optimized wallet service APIs by consolidating redundant calls, reducing request volume by **50%**, eliminating **8,000+ TPS monthly** load, and saving approximately **\$3K/month** in infrastructure cost.
- Mentored junior engineers through design discussions, code reviews, and onboarding support.

Software Development Engineer I (SDE1)

Amazon Inc.

July 2021 – April 2024

Vancouver, BC, Canada

- Worked on multiple Global Payment Authentication Team services that improve customer trust through a rich set of payment challenge methods (such as **CVV verification at card registration** and **3D Secure challenges**) that limit friction while ensuring protections against fraudulent payments.
- Created and owned a new Payment Authentication Service featuring improved infrastructure and optimized business logic. Upon launch in the **Asia-Pacific regions**, achieved latency reductions of **39%–55%**, decreasing checkout wait time by **7–12 milliseconds**.
- Created and owned a **serverless, event-driven AWS Lambda service** enabling Amazon Customer Service teams to unblock genuine customers after consecutive incorrect CVV entries.
- Owned and completed **Graviton migration and JDK11 upgrade** for a tier-1 service; Graviton2 delivered up to **40% better price-performance** compared to x86-based instances.

Agile Developer Intern

SAP Canada Inc.

Jan 2019 – Dec 2019

Vancouver, BC, Canada

- Built frontend features for SAP Analytics Cloud using React, including autocomplete and typeahead functionality for the Search to Insight interface.
- Improved application load performance by **25%** by decoupling team-owned modules from the main application bundle.
- Enhanced analytics query capabilities with support for time-based data granularity and contributed to predictive features (Smart Discovery, Smart Insights).

Software Developer Intern

QHR Technologies Inc.

Jan 2018 – Aug 2018

Kelowna, BC, Canada

- Developed ETL tools and RESTful APIs supporting healthcare data workflows and internal analytics.
- Built Slack-based alerting to improve incident detection and reduce response time by up to **50%**.

EDUCATION

University of British Columbia

Bachelor of Science in Computer Science

Sep 2015 – May 2021

Vancouver, BC, Canada

- Recipient of Dean's Honor List in 2019 Winter Semester.
